

CURRENT EVENTS IN REVIEW

By Edward W. Pickard

Greeks Recall George

THE PEOPLE of Greece are once more king. The plebiscite resulted in his recall by a huge majority, and before long the monarch will be back on the throne he abdicated 12 years ago. The vote in favor of the restoration was almost unanimous, even in Crete, the birthplace of the republican leader Venizelos who is now in exile and under sentence of death.

As the results of the plebiscite came in, Premier George Kondeylis appeared on a balcony of a government building and announced: "As of tomorrow, King George II will be king of the Hellenes. There will be no political parties. They have been broken up by the people themselves and a new epoch of reconstruction will start."

"It's more glorious than I imagined. The expression of popular will to favor restoration was foreseen but results exceeded all expectations."

The cabinet met to swear a new oath of allegiance to the exiled monarch. All armed forces were called to take a similar oath.

A delegation sailed aboard a Greek warship to present the official request for King George to return. Officials said they expected King George, who was in London, to come back within two weeks.

China Adopts Managed Paper Currency

CHINA has definitely abandoned the metallic silver currency standard, adopted a managed paper currency and otherwise reformed its monetary system. The four-point program was announced in Shanghai by Finance Minister H. H. Kung just after Vice President Garner and his party of congressmen had left the city for Manila.

The American party was entertained by high Chinese officials, including Kung. But, despite much oratory of the kind across the sea character, no hint was given of China's contemplated action. However, all English language newspapers in Shanghai carried long interviews with Senator William H. King of Utah and Senator Burton K. Wheeler of Montana, both of whom practically told China that it was not any of her business what America did about silver.

The new Chinese program provides for: 1. Nationalization of silver, 2. Restriction of bank note issues to three government owned banks, 3. Stabilization of the Chinese dollar at the present level, 4. Legalization of bank notes for payment of all debts which provide for payment in silver.

Reds Are Not Blamed for Attack on Premier Wang

PEKING of the Chinese police that the attempt to assassinate Premier Wang Ching-wei was part of a communist plot was derided by the foreign office at Nanking.

The theory was widely held, however, that the gunman, Sun Fuzhai, who died of bullet wounds inflicted by the premier's bodyguard, acted because of his anti-Japanese feelings. The premier whose condition was pronounced as "satisfactory" was considered friendly toward Japan.

Germany Plans Extension Toward the East

GERMANY has no designs on western Europe, but she does intend to promote her expansion in the Baltic states, and hopes later to divide the Ukraine with Poland. That is the substance of assertions made by Perthuis and Genevieve Tabouis, two of the leading political writers of the Paris press. They say Dr. Hjalmar Schacht, minister of finance, revealed these plans to Jean Monnet, president of the Bank of France, and Monnet-Normin, president of the Bank of England, at a recent meeting of the Bank of International Settlement at Basel, Switzerland.

Schacht, the writers say, exhorted the two financiers to act with Germany "in the financial field" to end the Italo-Ethiopian conflict as soon as possible. He is reported to have warned them that "the economic dislocation of Europe, ruin the lira and ruin even the pound sterling."

Neutralization of Gibraltar May Be Demanded by Italy

WHEN the nations get together in London in December for the next naval conference it is not likely they will be able to agree on much in the

way of limitation of naval armament.

But there is a good prospect that Italy will there demand the neutralization of the straits of Gibraltar, which would be extremely distasteful and perhaps embarrassing to Great Britain. Diplomats are certain the British would refuse to make the concession. They say Mussolini's purpose is to force Britain to declare her intentions in the Mediterranean, where a large part of her war fleet is massed at the present time.

It was reported in Paris that the Duce would ask that the straits be put in the same status as the Suez canal, and would offer to scrap two 3,000-ton battleships now under construction as an evidence of his good faith. Britain hopes France will support her attitude concerning this demand and in return may expect to take a larger percentage of exports from French Morocco to strengthen France's position in that colony. French naval experts said that, while neutralization of the straits would guarantee free passage for France for all time, yet "it would be better to have a strong British hold on Gibraltar. In case France got in a war with Germany and was faced with the prospect of German submarines entering the Mediterranean to ravage her commerce and stop transport of troops from north African possessions."

Sanctions Against Italy in Effect November 18

THE League of Nations set November 18 as the day on which the economic sanctions against Italy should be put into effect, and later decided that coal, iron and oil should be included in the embargo. The league appointed Premier Laval of France and Sir Samuel Hoare, British foreign minister, to carry on peace negotiations with Italy. Sir Samuel still insisted any peace must be within the framework of the League.

The Italian armies on the northern front pushed further into Ethiopia, following the tanks and with bombing planes active overhead, and one column entered the city of Hazeion on the way to Makale. The invaders met with no resistance of consequence. The government at Addis Ababa announced that Italian planes had killed 30 women, 15 children and 100 cows with bombs and machine gun fire at Goralieb.

Emperor Haile Selassie Celebrates Anniversary

WHILE the invading Italians were pushing further and further into his realm, Emperor Haile Selassie I of Ethiopia celebrated the fifth anniversary of his coronation.

The emperor, who he did it in the style, too. Escorted by a throng of feudal chiefs in barbaric attire, the king of kings and his queen passed through the streets of Addis Ababa amid wildly cheering thousands, and gave thanks to God in St. George's cathedral. Afterward, seated on his ivory and teakwood throne in the palace he received the congratulations of the chiefs and the diplomatic corps. In the afternoon Haile gave the soldier a great feast of raw meat, and in the evening he entertained the diplomats and nobles at a state banquet with golden service and rare wines.

The emperor holds that the big oil concession negotiated for American interests by F. M. Hockett, the English promoter, still holds good although the Americans relinquished it in the suggestion of Secretary Hull. "This concession," said Haile, "is an integral part of our national economic program. We purposefully granted it to a neutral country like the United States in order to avoid political complications and international jealousies. It is unfortunate that war must delay its fulfillment. Through the benefits accruing to this concession we hope to raise the social level of people and provide them with honorable remunerative employment."

"I am sure that when our country is again at peace, and the circumstances are propitious, all the terms of the enterprise will be carried out by the original concessionaires, who never canceled the concession, but merely withdrew temporarily at the suggestion of the State department for the worthy motive of promoting international peace."

Milwaukee "Fiend" Killed by His Own Bomb

MILWAUKEE, which had been terrorized for eight days by a succession of mysterious dynamite explosions, was relieved when the terrorist, Hugh Frank Turkowski, was blown up by his own bomb as he was preparing for another outrage. Unfortunately a little girl was killed by the same blast. The bomber, described by a list of police as "an extreme low type of individual with a warped, criminal mind," had at least one accomplice who may also have been blown to pieces by the explosion.

Monotony

Whether we are rich or poor, we all have to fight against monotony—doing the same thing over and over until it loses interest.

We can fight monotony with variety, and one way to do this is by making a wise use of leisure. If we wish to avoid the feeling that we are merely machines, we must become interested in many things.

Patience

Patience is bitter, but its fruit sweet.—Rousseau.

IMPROVED SUNDAY SCHOOL LESSON

By REV. P. D. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago, and Western Newspaper Union.

Lesson for November 17

THE RETURN FROM CAPTIVITY

LESSON TEXT—Ezra 1:1-6; Psalm 126:1-6. GOLDEN TEXT—The Lord hath done great things for us, whereof we are glad. Psalm 126:3. PRIMARY TOPIC—A New Song. JUNIOR TOPIC—Coming Home Rejoicing. INTERMEDIATE AND SENIOR TOPIC—Making a Fresh Start. YOUNG PEOPLE AND ADULT TOPIC—Thanksgiving for God's Care.

1. The Return Predicted (Jer. 23:1-14).

It seems that false prophets were flourishing in Babylon telling the people that they would speedily be restored to their own land. To counteract this the Lord moved Jeremiah to send this letter to the captives in Babylon (vs. 8, 10). In this letter he advised them to settle down and quietly pursue their regular callings of life and not to be led astray by the false prophets (vs. 6, 7).

2. The length of the captivity (vs. 10). Their coming back was to be "after seventy years." From Daniel 9:2 it is clear that seventy years means a definite time. It dates from the time when the first company was taken captive, among which Daniel was found.

3. Recovered by God (vs. 10-14). God's purpose in the captivity was to cure them of their idolatrous practices. He assured them that when his purpose was accomplished he would visit them and convince them of his good purpose toward them. Their captivity would turn away, gather them from all the nations, and bring them into their own land.

II. The Predicted Captivity Fulfilled (Ezra 1:1-6).

1. The proclamation of Cyrus (vs. 1-4).

a. This was not by accident, but by the word of the Lord might be fulfilled (vs. 1). What God has promised he will do; he never forgets.

b. By divine initiation (vs. 1). "The Lord stirred up the spirit of Cyrus." How this was done we do not know. Possibly Daniel brought to his attention the prophecy of Isaiah and Jeremiah (Isa. 44:28; Jer. 25:12). Every impulse to do good in all men is caused by the Lord. It may have been that Cyrus only saw his own action as a piece of statecraft—the cration of a buffer nation between his kingdom and that of Egypt.

c. The content of his proclamation (vs. 2-4).

(1) "The Lord God of heaven hath charmed me to build him a house in Jerusalem" (vs. 2). This makes clear that he had some impression of God's hand upon him.

(2) Appeal to Jewish patriotism (vs. 3). He invokes upon such as possess the national religious feeling, the blessing of God, and commands them to go and build the house of the Lord God.

(3) Lend assistance (vs. 4). Many of the Jews were established in business and therefore were not free to go. Many, no doubt, had lost their national spirit and therefore did not desire to go. All such were to lend friendly assistance in silver, gold, and beasts.

2. The response to Cyrus' proclamation (vs. 5, 6). The chief of the fathers of Judah and Benjamin and the priests and Levites presented themselves as willing and ready to go. The company which returned was largely made up of representatives of Judah and Benjamin.

3. The royal favor (vs. 7-11). Cyrus brought forth the vessels of the house of the Lord which Nebuchadnezzar had carried away from Jerusalem and put into the house of his gods. Now to have 5,400 of these vessels returned to their owners and sent back to Jerusalem to be put to their original use, met a hearty response by the Jews.

III. The Gladness and Rejoicing of the Returning Exiles (vs. 12-14).

1. The proclamation of Cyrus as a dream (vs. 1). They recognized that their going back was through the favor of the Lord.

2. Their laughter and singing (vs. 2, 3). They not only recognized this as the favor of the Lord upon them, but testified thereof in the hearing of the heathen round about them.

3. Their prayer for prosperity in the land (vs. 4). They were not only going back with the consciousness of the good hand of the Lord upon them, but were trusting him for fruitfulness of the land.

4. Sowing in tears (vs. 5, 6). The seed which they were to sow in the land was so precious that they seemed to have hesitated as to sowing, and yet they recognized that joy would follow their sorrow as they brought with them the sheaves of the harvest.

Monotony

Whether we are rich or poor, we all have to fight against monotony—doing the same thing over and over until it loses interest.

We can fight monotony with variety, and one way to do this is by making a wise use of leisure. If we wish to avoid the feeling that we are merely machines, we must become interested in many things.

Patience

Patience is bitter, but its fruit sweet.—Rousseau.

SEEN and HEARD around the NATIONAL CAPITAL

By Carter Field

FAMOUS WASHINGTON CORRESPONDENT

Washington.—Evidence increases that there will be a real drive for the 30-hour week when congress reconvenes. In fact, despite the bitter opposition of many business men, particularly large employers whose plants require continuous operation to obtain maximum efficiency and economy, the probability is that congress would pass the 30-hour week bill at this season if the union labor leaders were sincerely for it.

Nearly every development is gist to the mill of the measure's advocates. For example, the latest government figures show that wage payments—rough way of stating employment—have advanced to within 71 per cent of normal, but production as a result of that employment and these wages has reached 91 per cent of normal.

Its technocracy all over again—the constantly recurring problem of how to pass the work around—how to keep enough consumers in funds to purchase the products of the decreasing number of workers.

Many experts still think that this cycle, far more than the loss of cash by the purchase of foreign bonds that later defaulted, and infinitely more than the stock market crash, was responsible for the economic troubles which began in this country in 1929.

No better illustration of this theory has ever been advanced to this writer than what he discovered in Birmingham, in August, 1923. Just a year before, the steel mills of that district had employed 42,000 men. In August, 1923, they were employing only 21,000 men. But they were turning out more steel!

Down the Line

In short, 18,000 well paid men had lost their jobs, had stopped buying at the local department store and other stores, were wearing old clothes and squeezing their pennies. Newspapers were forced to cut expenses because the stores had been forced to cut their advertising. And so it went all the way down the line—more than two months before the stock market crash, and the same thing was happening in Pittsburgh, Gary, Youngstown, Chicago and Bethlehem. The same sort of thing, to a greater or lesser extent, was happening in every other industry, which meant that the buying power of the country was being dried up.

But virtually nobody realized it! In the last session of congress so much sentiment developed for the 30-hour bill that, in the early stages, before any leader told a group of editors to ignore the general legislative situation that they expected some modification of the 30-hour measure, if not that itself, to pass. It did not pass because union labor leaders traded it for the Wagner labor relations bill. They far preferred that.

There are two major objections to the 30-hour proposal, one by the big employers, and the other by some of the very people who believe that the type of thing illustrated by the Birmingham steel mills not only caused the depression, but has held back the return of prosperity.

The objection of the employers is that it will disrupt their organizations. Thirty hours a week is only five six-hour days. Such a limitation on work hours does not fit in readily with shifts. And of course there is always the objection to a blanket raise in wages, boosting production costs. This last phase is especially true now because business generally is concerned over the resentment of housewives in particular and buyers in general over advancing prices. Also because they know that security bill taxes for old age pensions, unemployment insurance, etc., are shortly going to advance production costs further.

The objection by the theorists is that any such move is just a temporary palliative. Further advances in labor saving machinery—additional short cuts will come. They fear the 30-hour measure might prove a veritable strait-jacket.

Stock Rise Too Fast

The stock market has been rising too rapidly to suit the administration. Information to this effect comes from the same sources that enabled the writer to make this same statement in June, 1923, when it may be remembered, the administration literally snatched the market down and took considerable pleasure in the process.

The administration does not want any such crash at the moment. In fact, all it wants is a small decline, and it does not want that until after January 1.

The significance of this is that it knows many business executives plan their budgets around the end of December and at that time lay out their plans for expenditures and expansions during the year. For this process the administration wants the business leaders of the country to have all the encouragement possible. Hence it will make no move to interfere with the boom so evident in the market until after January 1.

Of course the administration even then does not want anything approaching a confidence-destroying debacle. It would merely like to see a decline set in which would carry security prices, stocks in particular, down to a level from which a slow, creeping progress could be made next summer.

Loses New York

This emphasis on New York is abundantly justified by the recent poll, which indicates New York is against the President. Also two of the trans-Mississippi states included in the anti list in these dispatches—California and Kansas.

So that the important new point is really involved in the additional Middle Western states—Iowa, Nebraska, Minnesota and South Dakota. Wisconsin may be left to one side. No political observer believes that Wisconsin will back over the traces if the La Follette organization sets out to deliver it to Roosevelt. Further, no one has much doubt that the La Follette will do just that. If there should be any slip-up there, it would be in the lineup. It will be just too bad for Roosevelt. It would make the New Deal battle line so long and vulnerable that breaks would be sure to occur somewhere.

But these farm states in question, from Nebraska up to Minnesota, may be depended upon to go as the intelligent self-interest of their farm population determines.

CANINES POSSESS VOCABULARY, SAYS KENNEL AUTHORITY

Dogs can speak and reason, according to an article, by Henry Charles Suter, in the American Kennel Gazette.

"The fact that mankind alone possesses the power of consequential thought," writes Mr. Suter, "is a pleasing, popular, but to say the least, a somewhat presumptuous notion. The truth is that animals can be taught. Certainly, dogs can be trained, as anybody knows, but they also can learn much through their own reasoning faculties and by experience and observation."

"It is not instinct alone that teaches a dog how a door may be opened by the simple raising of a latch, or is it more instinct that makes a dog measure time. Does not a domesticated dog, in a methodical family, accommodate himself to the habits not only of the household but of the individual members of it with most persistent precision?"

"Dogs' understanding and use of speech is explained as follows: 'There can be no question that dogs, although they are unable to respond similarly, can understand many words and phrases of human speech. Clearly, it must be accounted to some dogs that they possess a considerable vocabulary, since many a chance expression in an ordinary conversation, brings an apparently sleeping dog to animated attention.'

"Since dogs can understand human speech, it must be conceded, in a lesser degree, that we understand theirs. For to the practical ear, the barking, even of an unseen dog, carries, in the variations of tone and tempo, many diverse significances. Surely in the expressions of welcome, fear, anger, menace, defiance, warning, enjoyment, there are distinct and different tones."

"Were our hearing powers developed to the possibilities of the dog, probably we should realize that the canine language is far more flexible and expressive than we suppose."

Real Learning

It's what we learn after we think we know it all that counts.

Still Coughing?

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid in the soothing and healing of the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

Miserable with backache?

WHEN kidneys function badly and you suffer a nagging backache, with dizziness, burning, scanty or too frequent urination and getting up at night, when you feel tired, nervous, all upset... use Doan's Pills.

Doan's are especially for poorly working kidneys. Millions of boxes are used every year. They are recommended the country over. Ask your neighbor!

CAUGHT IN THE WILD

By ROBERT AMES BENNET

Copyright by Robert Ames Bennet

WNU Service

SYNOPSIS

An Alan Garth, prospector, is preparing to leave for his mining claim in the Far North, a plane lands at the emergency station. In it are three men, a woman and a child. The woman, his daughter, Lillian, and Vivian Huxby, pilot and mining engineer. Believing him to be only an ignorant prospector, the men offer to make an air trip to Garth's claim, although they refer to his samples of platinum-bearing ore as nearly "worthless." Lillian, however, prodigal of the jazz age, plainly shows contempt for Garth. Through Garth's guidance the plane soon reaches the claim site. Huxby and Lillian, after making several tests, assure Garth his claim is nearly worthless, but in "encouragement" young prospectors they are willing to take a chance in investing a small amount. Sensing treachery ahead, Garth secretly removes a part from the motor of the plane. Huxby and Lillian, ignorant of this, try to start the plane, but find it impossible to do so. Garth then explains to them the reason for their failure. He points out that he is their only hope in saving them out of the wilderness.

CHAPTER III—Continued

"Don't you see," said Garth. "You may reach the top of the glacier with the soles still on your golf-course boots. Your father, I fancy, will prefer to wait here a while. For one thing, he knows that in his present condition, he never could climb the pass. In the second place, he has no desire to go down the other side on his uppers."

Huxby looked from Mr. Ramill's flimsy efforts to the girl's fashionable sport boots, and then at Garth's worn moccasins.

"Well, Jack, what's the answer?"

"That it's not well," Garth replied. "In the first place, you'll drop that name and tone in speaking to me. Am I understood?"

Huxby stood silent, his eyes cold and his tight frown. But Mr. Ramill spoke for him, with decision: "That is understood, Garth. We are all now in the same boat, and you are skipper. How about the shoe problem?"

"Moosehide. Well, first shift along shore to the mouth of the river. It's the best place to camp. I'll then go on around to the muskeg and collect some hides."

"Don't be too sure of that," Huxby differed. "Keep hold of the rifle, chief. He'd streak out and leave us to hold the sack."

"I don't you realized yet that the joke is on you?" Garth inquired. "It's a question of trusting me absolutely, or not at all. Take your choice."

Mr. Ramill handed over the rifle. Huxby's hand tightened on the butt of his favored pistol. Garth gazed past him down the lake.

"The plane seems to be edging over towards the east shore. There's a ford up here, Huxby. You're welcome to try for the plane. If you save her, I'll call it a break of the game in your favor, and we'll all ride out on the air."

"Lay off, Vivian," Mr. Ramill interposed. "The plane has veered out again. He has snipped fast."

Without any reply, Huxby thrust his pistol inside his leather jacket and started up the stream bank. Garth came ashore to his pack. He slung it on his back.

"Come on. Let's head for camp."

"Why not follow Vivian?" Mr. Ramill inquired. "It is still possible the plane may drift ashore."

"A hundred to one chance it will not, sir. We'll go out on moosehide, if at all. I've decided not to make it alone. A trip through the muskegs may lead you to realize that even lone woodsy prospectors should be entitled to the fruits of their discoveries."

The girl's smoldering rage flared out at him: "You second-rate! Deceit us into this beastly hole, and then turn our plane adrift. You cowardly sneak! Everything drifting away from it—and all the food and wine. Oh, damn! What am I going to do? I'll starve!"

Her father looked at Garth with the first sign of concern that he had shown. "Yes, that's it. You might have thought of her. A girl so delicately reared! I say nothing as to myself; it's all in the game. But a lady—to drag her down into the raw like this! Marooning her to starve in the bogs!"

Garth looked from father to daughter. "A lady, did you say? Oh, yes, to be sure—a dainty, refined lady, who comes and drinks and joins in schemes to like a supposedly simple bush vagabond out of his fortune."

"Pah!" she scoffed. "Whining because we would not let you foist yourself on us as a gentleman. As for your twaddle about that claim, mines are treasure troves. They belong to whoever is clever enough to get hold of them."

"Right-o, my lady," Garth approved. "Which leaves only the small matter of food and drink to be considered. You'll be able to chew moose meat, I fancy, after you've fasted off some of your fastidiousness."

Indifferent whether or not the girl and her father followed him, Garth

started to back trail through the lower growth of spruce trees.

Where the spring rill came bubbling over ledges down to the rocky shore, he halted in a small clearing. There had been his camp on his previous visit to the valley. Ten feet up the branch-trimmed trunks of four closely grouped birch trees, a tattered moosehide hung over the edge of a pine platform.

Garth glanced up at the platform. "Wolverines have robbed the food cache. But there's plenty more meat on the hoof. While I go for some, you two will start gathering wood."

Miss Ramill's nerves were on edge. She snapped at him hysterically: "You insolent bully! Don't you dare to try to give me orders!"

Her father had squatted down on the warm rock, tired out by his day's exertions. Garth spoke to him: "You must be enough. The cold that has all three of you would do as I thought best. Huxby promptly tried again to bluff me. Now your daughter talks."

Mr. Ramill raised his down-swept head. "You'll not be able to say that of me, young man. I stand by your terms. I always play to win. But no one can truthfully claim I ever wench or revoke. I will take your orders, and so will Vivian, now that he has had time to realize the situation."

"How about your daughter?"

"I'll leave that to you. If you can control her, you'll be doing more than I have ever been able to do."

Garth met the disdainful gaze of the girl with a smile. "So your father farms you over to me, my lady. Let me hasten to secure you, I beg to decline the honor."

"Ah, indeed?"

"Yes. I'll let old Mother Nature spank you till you come to your senses."

Her blue eyes flared with scorn. "Oh, you—you! Don't!"

"Better save your energy," he advised. "You'll need it all, unless your pride stoops to the snaw work of campfire tending. Snake drives off insects. For another thing, no wolf, wolverine or lynx, or even a grizzly, will venture close to a fire. Think that over, Mr. Ramill, you have your point of view."

He swung away between the spruce without waiting for any reply, left alone with her exhausted father, the girl might come to realize how utterly she had crashed out of her soft and luxurious civilized environment.

A girl whom even her father had been unable to control! That had been evident from the first. She was a badly spoiled product of the jazz age—willful, arrogant, utterly selfish. For untold she had shown herself no less hard physically than mentally. Other, who he would have played the game in a different way. No weak-minded woman could make that travels to the Mackenzie.

As for her father, he had only himself to thank. A private school expected to take his chances. He might be gone out to the river, and he might not. That depended upon his heart. Soft muscles could be hardened. Not so a weak heart.

No question as to the girl and Huxby, if they obeyed orders. They could make it.

A crash in the alders broke in upon Garth's thoughts. The splash that followed told him a moose had caught his scent and taken to the lake. To have run to the bank and shot the swimming beast would have been easy. Only, he had no canoe or raft, and the water here was rather deep offshore.

He stalked down through the timber. For the first hundred feet or so out from the shore thickets, willows grew along both sides of the low ledge. A peer through the foliage showed the immense palatine antlers of an old bull moose.

Garth dattened down on the moss-covered dyke and crawled away from the bank. Shoreward, on the other side, he caught sight of a slight movement among the willows. He rose on his knees and swung up his rifle. Though he was still screened by the brush alongside the ledge, his quick movements sent a strong whiff of man-scent downwind.

With loud snorts of alarm, two cow moose, a calf, and a young bull heaved up among the willows less than a dozen yards apart. They started to plunge forward out of the thicket. Garth's first shot dropped the calfless cow with a bullet through the head. His second bullet glanced off the base of the bull's left antler. Partly stunned by the shock, the bull swerved sideways, only to drop in his tracks, shot through the heart.

Silently as he had stalked out the ledge, Garth returned to solid ground. He knew that the snorting, bawling moose in the pools would soon quiet down and return to their lily-pond feeding. The only requirement was for him to keep out of sight and either across or down wind from the stupid human hunters.

A few steps along the bank brought him to a game trail through the thickets. He laid down his rifle and waded out to the dead bull. The body lay on

a down-leant mat of willow stems. Garth at once set to work with his knife.

To dress out a thousand-pound animal is no light task, even under the best of conditions. Garth thought nothing of it. All the hide within reach slid free to the quick draw of his curved knife blade. With belt-ax and knife he cut off the antler head, then the upper foreleg and hindquarter. After that he was able to heave the carcass over by the leverage of the other legs.

When he had finished with the bull, he went to the cow. She weighed perhaps 200 pounds less, and was therefore easier to dress out.

With the two skins and all the meat ashore, he took a dip in a clear pool and washed his backskins. As he shed out of the willows in the wet garments, he saw Miss Ramill staring through her handkerchief at the eight big legs. He had hooked them on the stabs of spruce limbs. Her gaze hovered from the other raw moose products that were piled on one of the hides. She turned from them leathily.

"Faulch! What a stinking mess! Have you started a smoking plant?"

"The smoking is just about to start," he replied. "Are you too foolish to carry this rolled skin? It's the lighter one."

"That filthy thing? You may be sure I'm not so foolish-minded as to touch any of your lather mess."

"Very well, only remember, it's your own choice, aster."

He bagged the contents of the bull hide, slung it on his back, picked up his rifle, and headed for camp. The girl looked from him to the folded moose cow skin, hesitated, flushed angrily, and followed, empty-handed.

While still some distance from the rill, he whiffed a tang of wood smoke. He quickened his step. It gave him a

pleasant surprise. After all, the girl seemed to have given in, at least partially. He turned to her with a friendly look. She met it with a scornful smile.

They came to the opening where Garth trimmed a pair of green willow splits, opened the moosehide, and cut two slices of liver. He put a slice on each spit, and started to broil them over the coals. With a look of disgust, Miss Ramill turned her back and sat down on the rill bank.

Before long the broiling liver began to send out an appetizing odor. The girl's nose went up for an involuntary sniff. Garth met the intent look of her father, and allowed his left eyelid to flutter slightly. Another turn of the spits completed the broiling. He handed one of them to Mr. Ramill.

The millionaire lifted his headnet to take a glancing nibble at his hot meat. His heavy face brightened with a surprised smile. He snatched his lips and bit off a large morsel. At the sound, his daughter jerked around. Garth was biting into the other piece of liver.

The girl cried out her indignation: "You greedy pigs! Where's my piece?"

"Help yourself!"

He met her furious look with cool indifference, and went on eating. Unable to blast him, she turned to her father.

"I'll take yours, Dad. You've had two bites. It will not take you long to cook another piece. Make it three!"

At that, Garth swung around between father and daughter.

"Mr. Ramill, we'll settle this right now. You said you'd leave her to me. I cooked that meat for you. She will cook her own meat, or go without."

The older man sat for several moments considering the matter. He then raised his piece of meat and resumed his meal. Lillian Hamill stared at him, her eyes wide.

"My own father! But wait till Vivian comes back!"

He was still eating. The girl's face was a study. She was trying to decide whether to follow her father or her daughter.

Burn Money in Honor of the Dead in Indo-China

The world depression has not diminished in the slightest degree the prosperity of the paper industry in England, in France, in China, in the United States. Some of the money out paper money by the ton to be burned at funerals so the deceased will have plenty of money in the next world.

David Hunter, one of the leading authorities in this country on the art of papermaking, would not however, recommend the same practice for the United States. He said on his return after a four-month journey to the Far East:

"I am tired, boy—and hungry as a shark. Could eat all the rest of them."

"Not now. You'll rest, do some work, and then set another one. Call this valley one of those physical culture sanctuaries where the tired first-class man is worked and lashed back into full condition."

"I have yet to agree to such training, Garth."

"Take your choice. If you refuse, I give you my word I'll never reach the Mackenzie. I might back pack you in some place; you don't wish meat over two hundred. Happens, though, I'm not a dudder. You'll go on your own foot."

"Very well. Put me on them."

Obedient to directions, the big man stretched out that night to snowmelt rock. Garth turned about to pull the moosehide and what was upon it into the shade of a forest.

Miss Ramill thrust in front of him and seized his knife. She snatched at the liver. The blade was razor-sharp. Her many strokes not only cut through the liver, it slit the moosehide as well.

Garth said nothing. Though for him that hunter had hunched the knife, he had learned her first lesson. Long fingers had passed since her family breakfasting on white meat delicacies in the comfort of a manor house far over on the Mackenzie. She was fairly reverent.

The finger tips twitched with a suspicion as she held the spotted slice of liver close up to the coals of the fire. Well satisfied, Garth long the remaining liver, the tongue, and muscles under the cache platform.

A shadowy figure on the ground below the meat drove off the flies.

Miss Ramill's only thought had been for her food. She did not think of putting trash on the cache. When it did down to campers, she jerked the party back, invariably rare soon of liver from the cache. When a spot, there was now no liver to be seen.

I'M SOLD

It always works

Just do what hospitals do, and the doctors insist on. Use a good laxative, and Nature to restore clockwork regularity without strain or ill effect.

A liquid can always be taken in gradually reduced doses. Reduced doses is the real secret of relief from constipation.

Ask a doctor about this. Ask your druggist how very popular Dr. Caldwell's Syrup Pepsin has become. It gives the right kind of help, and right amount of help. Taking a little less each time, gives the bowels a chance to act of their own accord, until they are moving regularly and thoroughly without any help at all.

Dr. Caldwell's Syrup Pepsin contains senna and cascara—both natural laxatives that form no habit. The action is gentle, but sure. It will relieve any sluggishness or bilious condition due to constipation without upset.

There are two principal varieties of this illness. One kind consists of ordinary constipation; this is used at the hospitals of ordinary citizens, where it is treated with a cathartic. The other kind is a more serious condition, known as "chronic constipation." It is treated with a cathartic.

The constipated lips twitched with a suspicion as she held the spotted slice of liver close up to the coals of the fire. Well satisfied, Garth long the remaining liver, the tongue, and muscles under the cache platform.

FARMERS' COLUMN

THE FARM AND HOME

Hens which lay well into the fall
lay more eggs during the year than
hens which stop laying and molt dur-
ing the late summer or early fall. It
is good practice, therefore, to select
late moulting fowls for breeders.

Chickens should be finished imme-
diately after hatching rather than just
before moulting, as dust irritates ma-
terials. Allowed to remain, dust set-
tles in spots which are difficult to
remove. For some materials dust is
responsible for the skin.

By proper cooking, savory and rela-
tively cheap dishes can be prepared
from the shoulder, breast, flank and
neck of lamb. The flavor of lamb can
be easily improved with onion,
celery, and vegetables, and
flavorful dressings also may be used.

Chilling the carcass is an important
step in home butchering. A tempera-
ture of freezing or a little above is
ideal for butchering. After the hog
carcass has been cleaned, splitting
down the center of the backbone and
the removal of the leaf and the
head will assist in the chilling.

Many farmers consider it good prac-
tice to dress sheep before winter.
Relieved of worms, sheep will be
better than the cold weather and will
not relish the cold weather. The
ewes free from worms produce more
and better wool.

Indigo is a dye made from the
leaves of the indigo plant. It is used
for coloring fabrics. The leaves should
be cut and dried before use. The
dye is made by boiling the leaves in
water and adding a small amount of
lime. The dye is then used to color
fabrics.

The production of wheat in 1935
is about 10 percent below the 1934
crop. This is due to a combination of
factors, including a late start to the
season and a lack of rain. The
production of wheat in 1936 is
expected to be about 10 percent
above the 1935 crop.

Recipe for Speed Nuts

The home economics department of
the university of Kentucky college of
agriculture offers the following recipe
for speed nuts:

Use 4 cups of nut meats, 1 1/2 cups
of sugar, 1/2 cup of oil, and 1/2
cup of vanilla. Mix the sugar and
oil with one cup of sugar and one
teaspoon of vanilla. Cook without
stirring in a saucepan until the syrup
makes a good, hard candy in cold
water. Mix the nut meats with the
syrup and vanilla. Pour the mixture
into a deep pan. When the syrup
reaches the soft ball stage, set the
saucepan over a pan of boiling water
to keep the candy hot. Add the nut
meats and mix. Add the vanilla, and
so that the candy is covered with a
thin coating of syrup. Pour the nut
mixture into the bowl with the sugar
and vanilla and stir until all the
kernels are covered with dry sugar.
Separate the kernels and store in a
dry, cool place until ready to serve.

1936 Wheat Adjustment

Applications are now available at
county agent offices for the new wheat
adjustment contract. This contract
will be in effect for the 1936 crop.
The contract will be in effect for the
1936 crop. The contract will be in
effect for the 1936 crop.

Farmers who produced wheat in
1935, 1934, or 1933 are eligible to sign
wheat contracts. The reduction for
next year is 5 percent of the 1935
adjustment program.

Snapshots of KENTUCKY GEOLOGY

by
Dr. A. C. McFarlan
UNIVERSITY OF KENTUCKY

Chapter XXX

In 1925 it was estimated by the
American Petroleum Institute that in
America 8,000,000,000 barrels of pe-
troleum had been removed from the
ground and that on the basis of esti-
mated reserves, a continuation of the
present rate of production over a
period of five years would see these
reserves well on the way toward ex-
haustion. New discoveries were un-
doubtedly being made, but these were
made in the estimates. With the in-
creasing use of petroleum as a motor
fuel a problem was to be faced in the
near future. To meet the impending
situation there were a number of
methods of attack:

(a) The finding of more efficient
methods of recovery, thus prolonging
the life of each pool, would mean the
postponing of that day. Such methods
are coming more and more into use.
(b) Finding a substitute. Alcohol
was a possibility, and petroleum may
be distilled from coal and from oil
shales.

While the estimate of reserves has
turned out to be quite an underesti-
mate and the last few years have seen
an overproduction of oil, yet the ulti-
mate date of exhaustion has merely
been postponed and when this day
comes oil shales will become a real
mineral resource and gradually take
the place of the drilled well.

Oil shale is more or less dark-colored
shale, dark because of the presence

of organic matter, which when heated
yields oil and gas. Distillation of oil
from such shale began in Scotland at
about the same time as the oil indus-
try developed in America. Oil is still
produced in this manner in Scotland
and also in some of our western states.

In the Kentucky Knobs there out-
crops a great series of black shales
varying from about 25 feet to several
hundred feet in thickness. They out-
crop again in the Cumberland river
region of southern Kentucky and along
the western flank of Pine Mountain.
A slab placed in a fire will burn.
Analyses of these in the mining lab-
oratories of the university of Ken-
tucky have shown an average of about
one half barrel and several thousand
feet of gas to the ton. On the basis
of the estimated tonnage of shale
available in the state, there is present
here a reservoir of around 50 billion
barrels of crude petroleum. This is
more than has ever been produced by
drilling in North America.

Of course, the whole problem is one
of cost of production, and relative cost
compared to that of drilling. While
the shale oil industry has not yet
developed in Kentucky, the time will
ultimately come when it will and what
is now a potential resource will become
a great actual resource. Of interest is
the fact that it is the Knobs region
which in general has been overlooked
in the distribution of agricultural and
mineral wealth. And it is this region
which will cash in on this industry.

Rogers and His Party

While Gen. George Rogers Clark with
his forces was floating down the Ohio
in 1778 in the start of his campaign
against the British strongholds in the
Northwest, he came to and crossed the
rapids during an almost total eclipse
of the sun, says the Cleveland Plain
Dealer. But these hardy backwoodsmen,
divorcing themselves from supersti-
tion, refused to look upon this as
an omen foreboding ill fortune. In-
stead they joked that this was the
sun which Great Britain boasted never
set on English territory—and it was
at last setting on America and particu-
larly the Northwest.

Eskimos' Language

All Eskimos use the same language,
whether they live in Canada, Siberia,
Alaska or Greenland. Some of the
words are written and spoken in sev-
eral different ways, each having its
own meaning.

Physicians in Soviet Union

In its training of physicians the
Soviet Union prepares 75 per cent of
its medical students to be general prac-
titioners, and the remainder, chosen by
examination, are educated as speci-
alists.

The Cardigan Jacket

The cardigan jacket originated from
a wool underjacket, knitted by the En-
glish Lord Cardigan's wife, for the pur-
pose of keeping her lord and master
warm in England's penetrating weath-
er.

Twins, Triplets, Quadruplets

In the human family only one in 87
conceptions give rise to twins; tri-
plets can be expected about once in
7,500 births and quadruplets once in
625,000 births.

Highest Peak in Grand Teton

Surveys show that the Grand Tet-
on, highest peak in the national park
of that name, is 13,769 feet high, or
10 feet higher than was supposed.

NOTICE

United States District Court,
Eastern District of Kentucky,
Consolidated Cause No. 3715—
At Covington, Ky.
Estate of Joseph E. Gay, Inc., et al.,
Petitioners.

vs.
Ohio & Kentucky Railway Company,
et al., Defendants.

Notice of Sale of Real Estate and of
Application in Court for Confirmation
Notice is hereby given that subject
to approval of this Court I have sold
certain real estate of Ohio & Kentucky
Railway Company located in Morgan
county, Kentucky, and have applied
to said Court for confirmation thereof
and that by order of this Court made
and entered November 10th, 1935, a
sale on said petition has been or-
dered to be held in this Court in the
4th and 5th chambers at Lexington, Ky.,
at 10:00 o'clock a.m. on November
14th, 1935; said real estate and the
proceeds and sum of money to be
paid for same are as follows:

To H. P. Jones, Iuka, Ky., a strip
of land approximately thirty feet in
width lying on east side of center line
of O. & K. Railway and extending
from the property line of R. W. May
up State Road fork of Red river with
line of property now owned by H. P.
Jones, at Lexington, 730 feet, to the
property line of W. D. Jones, contain-
ing about one acre for the sum of
twenty-five dollars.

To W. M. Harvey, Iuka, Ky., a
strip of land approximately sixty feet
in width, extending from the lower
property line of J. N. Anderson at
Adels, Ky., down State Road fork of
Red river about 300 feet to the upper
line of W. L. Hammond, containing
less than one acre, for the sum of
twenty-five dollars.

To J. N. Anderson, Iuka, Ky., a
strip of land at Adels, Ky., about
sixty feet in width extending from
the lower line of property of Jasper
Jones down State Road fork of Red
river, to the upper line of property of
W. M. Harvey, containing less than
one acre, for the sum of twenty-five
dollars.

To W. D. Jones, Iuka, Ky., a strip
of land approximately thirty feet in
width, near Adels village, extending
from the lower line of property of
Jasper Jones up State Road fork of
Red river, about 1500 feet to the line
of property of James McCarty, con-
taining three acres more or less, for
the sum of one hundred twenty-five
dollars.

See petition for order of sale for
a more particular description.
Witness my hand this 11th day of
November, 1935.

CLY W. LESLIE, Receiver,
Ohio & Kentucky Railway Company,
Cannel City, Ky.

But signers must grow 51 percent of
their bases.

There will be two installment pay-
ments, one next summer when the
wheat average has been made, and
one the following year, after signers
have showed evidence of compliance
with the contract of the second year.

The wheat contract will run four
years, but signers may withdraw at
the end of the second year.

Members of the state grain board
are S. O. Newsome, Graham; J. W.
Hodes, Harrodsburg; and C. C. Utter-
bach, Clinton.

Approximately 1,000 Kentucky farm-
ers have been eligible in the wheat
adjustment program.

Be Safe
WITH CHEVROLET'S NEW PERFECTED HYDRAULIC BRAKES
Safeguarding you and your family as you have never been safeguarded before

SOLID STEEL one-piece
TURRET TOP

a crown of beauty, a fortress of safety

NO DRAFT VENTILATION
ON NEW BODIES BY FISHER

the most beautiful and comfortable bodies
ever created for a low-priced car

SHOCKPROOF STEERING*

making driving easier and safer
than ever before

NEW PERFECTED Hydraulic Brakes

—the highest development of the
hydraulic brake principle—are standard on
all Chevrolet models for 1936. And, like
many other features of the only complete
low-priced car, these new brakes are exclusive
to Chevrolet in its price range! They are the
most efficient brakes ever developed. They
help to make Chevrolet for 1936 the safest
motor car ever built. Visit your nearest Chev-
rolet dealer. See and drive this car—today!
CHEVROLET MOTOR CO., DETROIT, MICH.
Compare Chevrolet's low delivered prices and the new greatly reduced
G.M.A.C. 6 per cent time payment plan—the lowest financing cost in
G.M.A.C. history. A General Motors Value.

IMPROVED GLIDING
KNEE-ACTION RIDE*

the smoothest, safest ride of all

HIGH-COMPRESSION
VALVE-IN-HEAD ENGINE

giving even better performance
with even less gas and oil

ALL THESE FEATURES AT
CHEVROLET'S LOW PRICES

\$495 AND UP. List price of New
Standard Coupe at Flint, Mich.
and live back, the list price is \$20 additional.
*Knee-action on Master Models only, \$20
additional. Prices quoted in this advertise-
ment are list at Flint, Michigan, and
subject to change without notice.

Useful Laundry Bag an Inexpensive Gift

By GRANDMOTHER CLARK

If you want to make up an inexpensive useful gift, here is a laundry bag that will answer very nicely. This bag, when made up, measures 15 by 20 inches. The embroidery design is stamped on muslin material ready to be embroidered and sewed up. You will find a wire clothes hanger about the house somewhere to sew into the bag. This stamped piece No. 1003 will be mailed to you for 15 cents. Hanger and crochet cotton are not included.

Address—Home Craft Co., Dept. A—Nineteenth and St. Louis Ave., St. Louis, Mo. Enclose a stamped, addressed envelope for reply when writing for any information.

Palace Houses Thousands

Some 3,000 of the 32,000 people of Split, one of the seaports of Yugoslavia, live within the walls of the Diocletian palace, which covers nearly nine acres and is one of the largest private residences ever built. Travelers who visit Split spend most of their time outdoors, so they can enjoy the brilliant sunshine.

Farmer Makes Home of Tomb, Fears Only Rats

Back in 1884, Linus Smith designed and built a mausoleum near Medina, Ohio, to hold the bodies of his entire family. But only the remains of Smith's father, mother and younger brother ever were placed in this tomb. Soon after the body of the younger Smith was placed in the vault, the door at the entrance was broken down and the body stolen. An unsigned note offered return of it for \$300. A neighbor youth was suspected, confessed the ghastly act and returned the body. This occurrence turned Linus Smith against mausoleums and he transferred all three bodies to a cemetery. The vault, empty for years, now is occupied by Charles Ritter bachelor farmer, who finds it quite a desirable place in which to live, cool in summer and warm in winter. A chimney was built and a stove installed which Ritter uses for cooking and what heat he needs in winter. Ritter says he doesn't fear ghosts nearly as much as rats that like to share his strange home with him.—Capper's Weekly.

Bee in His Mouth

A boy about ten years rushed into the Annapolis Md. Emergency hospital and stuck out a badly swollen tongue. Doctors and nurses tried to find out what was the matter, as he fidgeted and mumbled with pain. Ice reduced the swelling and then he explained. While he was eating, a bee flew in his mouth and stung him. He didn't feel like talking and soon left.

PREPARATION

Be sure you can think before you undertake to study.

LITTLE MISS MUFFET

SITS ON A TUFFET... AND SAYS 'I WANT NO WHENY!' I'VE GOT MY TUMS IF SORE STOMACH COMES... I'LL EAT MY FILL, TODAY!

"YOU NEVER KNOW WHEN" SO... CARRY... TUMS

PEOPLE everywhere are surprising their friends by eating foods they have long avoided by carrying a roll of Tums right in their pocket. Millions have learned the quick, safe way to eliminate heartburn, sour stomach, gas, acid indigestion in this pleasant way. TUMS represent a real scientific advancement. They contain no harsh alkalies. Instead a remarkable antacid that never does more than neutralize stomach acid. No danger of over-alkalizing the stomach or blood. The custom of carrying a roll of TUMS in your pocket will save many a day for you. They're so economical—only 10¢ a roll—ask any druggist.

FREE: This week—at your druggist—10¢ a roll of Tums. Offer good while supplies last. Limit one roll per customer. Good only in U.S. and possessions.

Lovely Skin! Reward of constant care

With Cuticura Soap and Cuticura Ointment. Let these gentle emollients be your beauty aids. At night bathe freely with hot water and Cuticura Soap. If any signs of pimples, blotches, red, rough skin appear, anoint with Cuticura Ointment. Daily care will help to keep the skin clear and attractive.

Cuticura Soap 25c. Ointment 25c and 50c.

Firestone GROUND GRIP TIRES WILL PULL YOU THROUGH.

REGARDLESS of WEATHER!

WITH these new Firestone Ground Grip Tires you can now go from one farm to another with no trouble at all, or you can drive into town no matter how bad the road conditions are. They will give Super-Traction in mud—snow—or soft ground—and you save time and money as you do not need chains.

No farmer can afford to be without a set of these new Firestone Ground Grip Tires this winter for his car or truck.

See your nearby Firestone Auto Supply and Service Store or Firestone Tire Dealer today and end your winter driving troubles. Specify these new Firestone Ground Grip Tires on the new tractor you are buying.

Listen to the Voice of Firestone featuring Richard Crooks, Nelson Eddy, Margaret Sgambato, Monday evenings over Nationwide N.B.C.—WEAF Network

Research Center for Agriculture Department

HERE is a sketch of the buildings of the large national research center for the Department of Agriculture at Beltsville, Maryland, on which work has been started. Nine thousand acres of land will go into the immense "Nature and Farm Study" which is planned to be the largest of its kind in the world. One thousand of the acres will be used in an experimental low-cost housing project.

Bedtime Story for Children

By THORNTON W. BURGESS

THE THREE WATCHERS

WHEN Paddy the Beaver slipped the water with his broad tail, making a noise like a pistol shot, Lightfoot the Deer understood that this was meant as a warning of danger. He was on his feet instantly with eyes, ears and nose seeking the cause of Paddy's warning. After a moment or two Lightfoot stole softly up to the top of a little ridge some distance back from Paddy's pond, but from the top of which he could see the whole of the pond. There he hid among some close-growing young hemlock trees. It wasn't long before he saw a hunter with a terrible gun come down to the shore of the pond.

Now the hunter had heard Paddy slap the water with his broad tail. Of course, there would have been something very wrong with his ears had he failed to hear it. "Confound that beaver," muttered the hunter crossly. "If

Paddy Watched the Hunter.

there was a deer anywhere around this pond he probably is on his way now. I'll have a look around and see if there are any signs."

So the hunter kept on to the edge of Paddy's pond and then began to walk around it, studying the ground as he walked. Presently he found the footprints of Lightfoot in the mud where Lightfoot had gone down to the pond to drink.

"I thought as much," muttered the hunter. "Those tracks were made last night. That deer probably was lying down somewhere near here, and I might have got a shot but for that pesky beaver. I'll just look the land over and then I think I'll wait here a while. If that deer isn't too badly scared he may come back."

So the hunter went all around the pond, looking into all likely hiding places. He found where Lightfoot had been lying, and he knew that in all probability Lightfoot had been there when Paddy gave the danger signal. "It's no use for me to try to follow him," thought the hunter. "It is too

dry for me to track him. He may not be so badly scared after all. I'll just find a good place and wait."

So the hunter found an old log behind some small hemlock trees and there sat down. He could see all around Paddy's pond. He sat perfectly still. He was a clever hunter, and he knew that so long as he did not move he was not likely to be noticed by any sharp eyes that might come that way. What he didn't know was that Lightfoot had been watching him all the time, and was even then standing where he could see him. And another thing he didn't know was that Paddy the Beaver had come out of his house and, swimming under water, had reached a hiding place on the opposite shore, from which he too had seen the hunter sit down on the log.

So the hunter watched for Lightfoot and Lightfoot watched the hunter.

THROUGH A Woman's Eyes

By JEAN NEWTON

ONE PATH TO CHARM THAT IS EASY TO ACHIEVE

I HAVE been reading an article about how dancing improves posture and carriage.

It is advised that we start in early childhood the training that brings about good posture and a graceful carriage. We are told of the rhythms which many schools are now teaching in the kindergarten, how proper breathing helps, the importance of good physical condition and always that paramount matter of example—

And this is one thing, this matter of a woman's walk, which has to my mind no expense. Any woman can walk well by just thinking about it! You can see the difference between a fine beautiful walk and a bad walk. And any child has sufficient initiative to learn to walk properly.

Some of the girls toward whom I am writing this are, I am sure, of the type who have normal physical build. The attainment of good carriage, of a graceful walk, is comparatively easy—and cheap. You need only think, when you are standing or walking, of how you are standing or walking, think about it until the carriage improved by your own consciousness has become natural!

© Dell Syndicate—WNU Service.

Dear Mr. Wynn: I am president of a debating society, and on next Saturday we are to debate the following subject, "Who Do the Sillyest Things, Men or Women?" It would help us considerably if you would tell me the silliest thing you ever saw a man do. Will you tell me?

Yours truly,

OTHELIA SORESPOT.

Answer: The silliest thing I ever saw a man do was one day in the post office. I saw this man wait around for two hours and the minute he saw the postal clerk turn his back, he pushed four letters into the box, without stamps, thinking he was saving the postage.

Dear Mr. Wynn:

A friend of mine was invited to a party at a young lady's apartment, and he went. During the evening he told the young lady, quite frankly, that he did not like her apartment. The young lady had my friend arrested and he was charged with assault. How did the judge figure out an assault charge?

Yours truly,

Y. SHODDIE.

Answer: The judge probably figured as long as your friend had said nasty things about the young lady's apartment he was guilty of "knocking her flat."

Dear Mr. Wynn:

I go with a crowd of boys and girls and once a week we meet and those who can sing do so, while others just tell jokes and stories. I tell jokes. There is one girl in the crowd who doesn't like me and every time I tell a joke she always says: "That joke is 40 years old." How can I cure her?

Truly yours,

JOE KING.

Answer: The next time you tell a

betting the children see good posture and graceful walking so that they will imitate it.

As I read this it came to me that not enough has been said about the carriage of our women. We hear a good deal about our bad voices, how unfavorably they compare with the voices of women of other countries, how important is a good speaking voice in a woman. But of a woman's walk, which is no less important than her voice in the impression she creates, in any hope she may cherish for that elusive quality of charm—it seems that far too little notice is taken, or expressed.

If we observe the walk of the average woman from the viewpoint of grace and charm, we must be struck with horror; so few women except those who are in some way athletic walk in a way which is satisfying to the eye. So few women have that stride from the hip that means freedom and poise in walking; so few have animation in their walk, so few, so very few, have rhythm.

No woman can have poise with a mincing little hop of a walk. No

woman can have charm who waddles from side to side, or women can have beauty who seems to be dragging one foot after another.

And this is one thing, this matter of a woman's walk, which anyone can learn without a teacher, which has to my mind no expense. Any woman can walk well by just thinking about it! You can see the difference between a fine beautiful walk and a bad walk. And any child has sufficient initiative to learn to walk properly.

Some of the girls toward whom I am writing this are, I am sure, of the type who have normal physical build. The attainment of good carriage, of a graceful walk, is comparatively easy—and cheap. You need only think, when you are standing or walking, of how you are standing or walking, think about it until the carriage improved by your own consciousness has become natural!

Will Rogers Medal Goes to His Widow

THIS "Spirit of St. Louis" aeronautical medal, voted to the late Will Rogers by the American Society of Mechanical Engineers before his death, was accepted by James H. Doolittle, noted flyer, and delivered by him to Mrs. Rogers at Santa Monica, Calif.

YOUTH AND THE MODEL "T"

By ANNE CAMPBELL

A PUFF and a speak, and it's plain to see, My daughter is having company! They all pile out of a Model "T"!

It's covered with paint of a lurid hue— Red and yellow and purple, too, And the windshield is strange to the adult view!

But the fifteen-year-olds who all say "It's 'hot' Are gay as if pulled in a chariot By six white steeds on a foxy lot!

It wheezes and I make a peculiar noise That is drowned by the laughter of the boys Who call for the girls in this weirdest of toys!

And I laugh, as I think I would rather be Middle and Jack with that Model "T" Than the wealthiest magazine of his toy!

Eavesdropping on the "Monticello Party Line"

"The Monticello Party Line" is a radio program recently begun on a series of middle-western and south-eastern radio stations. The radio listener is asked to imagine that he is eavesdropping on the party line of Monticello—and in this way he daily hears all the news, the gossip, the fun, and the occasional trouble, that makes life in Monticello.

All the people in this program are thoroughly natural, everyday folks. The setting is that of a real town—Monticello, Illinois—the home town of Dr. Caldwell's syndicate. The product that sponsors this new and different radio show, "The Monticello Party Line" is broadcast every week-day except Saturday.—Adv.

Fruit of His Labors

Chester Melancton of Hamilton Ohio, went out with a gun to hunt pawpaws, also known as pawpaws. He was shot and sentenced to ten days in jail. Later he learned that pawpaws were not birds or animals but an oblong shaped fruit.

Age of Yellowstone's Springs 14,000 Years

Because Yellowstone parks hot springs deposit travertine, a limestone like substance, in great quantities of calcium, it is possible to ascertain their ages, according to Prof. Herman Schmidt of the University of Missouri. The amount of calcium varies according to the age of the deposit.

Professor Schmidt has determined the exact springs ages. Terrace formations to be 14,000 years old. Liberty cap, the edge of an extinct hot spring is about 2,500 years old, and Hotel Terrace about 3,200.—Literary Digest.

Don't Guess But Know

Whether the "Pain" Remedy You Use is SAFE?

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are using for the relief of headaches, neuralgia, toothache, or any other pain, is your family doctor or a physician particularly skilled in the use of Bayer Aspirin.

He will tell you that before the discovery of Bayer Aspirin, pain remedies were given in a haphazard way, and that the sufferer had to endure the pain, or, at best, to wait for the relief of the heart.

Scientists told Bayer Aspirin, having the fastest method of discovery for the relief of headaches and the pains of rheumatism, neuralgia and neuritis. And the experience of millions of men has proved it safe for the average person to use regularly. In your own interest remember this.

You can get Genuine Bayer Aspirin at any drug store—simply by asking for it by its full name, BAYER ASPIRIN. Make it a point to do this—and see that you get what you want.

Bayer Aspirin

Heat and Cold

Asparagus Soup. Cut up the tips from the asparagus in one tall can, and set them in a sauté pan. Turn the rest of the asparagus, cut fine, and the bones from the can into a sauté pan. Add one quart soup stock and boil ten minutes. Press through a strainer and add a little cream. Sprinkle with chopped sweet red pepper in four tablespoons better after three minutes, add four tablespoons flour, and stir until thick and add spices. Then add the cream and stock thicken, and serve constantly till smooth and creamy. Add one-half cup cream and boil to taste with salt, pepper and spices, and serve piping hot. Serves eight.

Gold Medal Culinary Triumphs

COMING to our very triumphs in the field, and with our new automatic refrigerator, we may be said to have taken the best over all nations in food and in life. Such dishes as the following, for instance, would be served far less often if it were not for these invaluable adjuncts to our American summer diet.

Apple and Banana Froth:

Back the mild moon gelatin in
the table cream. Then pour the
table cream over the fruit and
a half cup boiling water, add one
tenth cup sugar and stir until
dissolved. Then add and add one
tenth cup milk and stir until
dissolved. Then add one eighth
cup sugar and one eighth
cup sugar. Add a half banana
piece, a half cup of honey, fold
in one to two white and pour
into a quart jar and chill
overnight. For hours
of fun, and fun. Serves eight.

Prize Pumpkin: Mix two
tablespoons cornstarch with one
tenth cup water. Add to two cups
chilled milk and cook to a
boil until thick and smooth.
Beat two egg whites slightly, add
the hot mixture and slowly, return
to the heat. Cook a minute
or two longer. Add one eighth
cup sugar. Add one cup can-
died fruit and one and a half
tablespoons cream. Flavoring, and
one refrigerator trays.
Serves eight.

Heat Often the Secret

Heat is often the secret of a successful meal. Every good cook knows that proper technique is the half battle, and possibly the only way to fulfill a host's duty to his guests are actually a combined under the festive board. The French, preeminent among all the cooks of the world, have certain ways of doing things that are not imitated in which such delicate as filet de sole can put before you sizzling hot.

But this is no time of the year to dwell upon hot dishes, although at the present time, doubtless, they are served at most summer meals.

A Word, Confidentially, to Mother and Dad

Thornton W. Burgess's Bedtime Stories delight the youngsters, but in addition to that they are really instructive. Every one contains some interesting and valuable nature lore. There is a Burgess Bedtime Story in this issue. Be sure to read it to the little ones in your home.

GIRLS and BOYS!

MEET Peter Rabbit, if you don't already know him. You will love Peter and his furred and feathered friends . . . Buster Bear, Danny Meadow Mouse and all the rest of them. The surprising adventures of these interesting denizens of the woodlands are told in the wonderful bedtime stories that appear in this paper. Do not miss a single one of them.

MOST MODERN

OF ALL BEVERAGES

If you were asked what is the most loved vegetable that is being consumed from the Atlantic to the Pacific and from Maine to Mexico, you could make only one answer: tomato juice. Tomatoes, which are thought to be native to the New World, are nothing new to our tables, but the drinking of the juice pressed from tomatoes has acquired such a vogue in the last few years that it has become the subject of considerable commercial campaigning. There are a number of reasons for this, all good, but the chief reason is that tomato juice is due to nearly every-

As is perfectly natural when an new beverage has such a vogue, everyone has taken a stab at making a tomato juice. Some people use and drink the juice of canned tomatoes, and save the vegetable themselves for use in other dishes. Others prefer the use of fresh tomato juices with seasoning added. Some try to put theilly, and concoct combinations of tomato juice and other ingredients. Tomato juice is a beverage which you do not tire, but it is interesting to know how some people have tried to vary it. Here are a few examples.

Feed Tomato Juice. Mix together and grill thoroughly the contents of two cans tomato juice, salt and pepper to taste, two tablespoons vinegar, a few drops of Worcestershire sauce and a few drops of Tabasco sauce. **Serves six.**

Tomato and Beef Stew. Add the juice of one lemon, one tablespoon sugar and salt to taste to the contents of two cans tomato juice, and have very cold. Add one-half pint ice cold charged water and serve at once in small glass cups. **Makes six cups.**

Tomato and Ginger Ale Pickle.

Strained Tomato Juice: Add two cups strained tomato juice and one-fourth cup sugar to boiling to dissolve the sugar. Add one-fourth cup lemon juice and one-half teaspoon of Worcestershire sauce, and pour into very cold in cocktail glasses. Serve six.

Tomato Frappe: Season the contents of a can tomato juice with salt, pepper, paprika and glasses and is recommended as especially efficacious for the morning after the night before.*

melon juice. Soften one-half teaspoon gelatin in a little cold tomato juice, and dissolve in some boiling tomato juice. Pour the whole mixture into refrigerator tray and freeze to a soft mush. Add one well-beaten egg white and freeze to a very soft mush. Serve with a tiny sprig of parsley on top. Serves four and costs not more than six cents.

With Other Vegetables
Tomato and Cucumber Cordial:
 Juice one medium cucumber thin
 with the peeling left on. Simmer
 together for thirty minutes three
 cups strained tomato juice, two
 cups water, one clove garlic, the
 seeded cucumber, one teaspoon
 salt, one tablespoon sugar and a
 few grains pepper. Strain and

Tomato and Celery Cocktail: Immer together for thirty minutes three cups strained tomato juice, two cups water, one cup celery (outer stalks and leaves), one bay leaf, one teaspoon horseradish, one peppercorn, one teaspoon salt and one slice onion. Strain and cool. Serve cold in cocktail glasses. Serves eight.

With Charged Water
Sparkling Tomato Beverage: Add the juice of one lemon, one tablespoon sugar and salt to taste to the contents of two cans tomato lee, and have very cold. Add one-half pint lee cold charged water and serve at once in small glass cups. Makes six cups.

Tomato and Ginger Ale Pick-Up: Add one tablespoon sugar, the juice of one lemon and a few grains salt to the contents of one can tomato juice, and chill overnight. Also chill one-half pint ginger ale overnight, and in the morning combine the two and serve at once. Makes four small glasses and is recommended as especially efficacious for the morning after the night before.*

THERE ARE NO SAFER BRAKES MADE

than the Super-Safety Brakes of the 1936 Ford V-8

FORD PERMANENT WHEELBASE

Radius rods [1] brace the front axle like a pair of giant arms. Radius rods and Torque-tube [2] give triple bracing to the rear axle. This means that the front and rear axles of a Ford car are always held equi-distant—in perfect alignment. On this permanent wheelbase any braking system now in common use could be used. Only with this Ford-type wheelbase, can mechanical, Super-Safety brakes be used to the fullest advantage.

4 INDEPENDENT BRAKE-ROD

Four brake-rods [3] of strong, tempered steel link the pressure of your foot on the pedal with the four big brake-drums on the wheels. They do this positively, surely, under all road conditions. Note especially that no one Ford brake has to depend on the other three. Failure of one—practically impossible—would still leave you three perfectly-operating brakes.

Tear out this chart and check it with the car you are driving now.

NO other car in America has the same basic design as the Ford V-8. *Because* of this design, the Ford could use *any* type of braking system now in common use. (Diagram at left shows why.)

With the whole field to choose from, Ford stands by *mechanically-operated Super-Safety* brakes as safest, surest, and most positive for the Ford V-8.

This is the type braking system used on many of America's costliest cars and most racing cars. Because of unique chassis design, Ford can use it to *better effect* than any other car built today.

All in all, no safer brakes are made than you get with the 1936 Ford V-8: Drive it today—and see for yourself.
